LEVELS OF CARE at ORCHARD GROVE

When considering assisted living, it's important to understand that care levels are tailored to individual needs, ensuring residents receive the appropriate support while maintaining as much independence as possible.

WHAT IS ACF LEVEL OF CARE?

The Adult Care Facility (ACF) level is appropriate for individuals who are independent with activities of daily living, but need help with the following services:

- ✓ Residential care, room, and board
- ✓ Housekeeping
- ✓ Personal care (assistance with showering/bathing)
- ✓ Medication Management
- ✓ Case management (financial/insurance, arranging appointments, medical transportation)
- ✓ Supervision to promote optimal safety and well-being

WHAT IS ALP LEVEL OF CARE?

In addition to what is offered at the ACF level, the Assisted Living Program (ALP) offers an alternative to skilled nursing services for individuals in need of additional care and services. An ALP resident is medically stable and is able, with direction, to take action sufficient to assure self-preservation in an emergency. The program is available to private pay and Medicaid recipients and offers the following services:

- ✓ Enhanced personal care (assistance with grooming, dressing, etc.)
- ✓ Medical monitoring and management of chronic conditions and diseases
- ✓ Certified Home Health Care intervention for skilled nursing and rehabilitative therapy services as needed and ordered by the primary physician
- ✓ Supervision with the use of oxygen and other medical equipment and supplies
- ✓ Incontinence care and management through scheduled assistance plans
